KERSHAW'S SAVE AGREEMENT

112 S. Hart Street
Kershaw, SC 29067

803.475.6122 or 800.497.9935

Mon-Fri: 7:30am-5pm

Sat-Sun: Closed

SC License M#103427

- Safety** - Assures proper and safe equipment operation to protect your family and home.
- Advantages** - Preferential emergency service and 15% off any repairs, if needed.
- Value** - 40% cheaper than normal Spring and Fall service.
- Efficiency** - .042 inches of dirt on a coil reduces efficiency by 21%.

A **SAVE** Agreement is an annual preventive maintenance agreement. We clean, test, and check your heating and air conditioning system twice per year.

PROTECT YOUR INVESTMENT

Preventive maintenance allows your system to work efficiently year in and year out as it ages. A system that is maintained experiences considerable fewer breakdowns. So protect your investment. You'll have peace of mind knowing that your system is saving you money on your utility bill every time it comes in. In most instances, savings are enough to pay the cost of the **SAVE** Agreement!

WHY SHOULD I PURCHASE A **SAVE** AGREEMENT?

Heating and Cooling systems work very hard to perform their duties. The constant stopping and starting, as well as continual operation can wear down a unit quickly and unexpectedly. However, by performing preventive maintenance, you can maximize the life of your system and guard against unexpected failures. Did you know that 9 out of 10 breakdowns are caused by dirt and dust? Preventive maintenance allows your system to work at its peak efficiency year in and year out as it ages. Most car owners in America have their car serviced on a regular basis. The same way that you need your car's oil changed and parts lubricated, or other items inspected and replaced, you must do the same with your heating and cooling system if you want your system to run safely, reliably, and efficiently. Please consider how many more hours

a day your heating and cooling system functions than your automobile. The same way that your vehicle ages over time, so does your heating and cooling system. There are ways to prolong the life of your system and to make it run more efficiently – the best way is preventive maintenance. For this reason – we offer a **SAVE** Agreement. Twice a year, we will come do a thorough check of your system. This includes cleaning coils, checking refrigerant, etc.
